SEO INVESTIGATION REPORT

BOT-20261019-ORGANIC-EXC-03

LEDSone UK — Locale URLs appearing in UK Google Search
Evidence report and screenshot appendix | 20 October 2026

1. Executive summary

This investigation concerns Polish (/pl/), Dutch (/nl/) and Spanish (/es/) locale URLs appearing in Google Search results for users in the United Kingdom. The objective is to establish whether translated pages are being surfaced in the UK in a way that creates unintended overlap with English pages, and whether a safe shared technical correction is justified.

Critical business requirement: Polish, Dutch and Spanish translated pages are required for international customers. Do not remove, wholesale-noindex or wholesale-redirect these locale URLs to English.

2. Original issue and reported metrics

- Original ticket figures: 2,612 locale URLs, 25,068 impressions and 20 clicks over the last 28 days; reported CTR 0.08%. These are ticket-provided figures.
- Other Search Console screenshots showed a /pl/ UK view around 28.3K impressions / 73 clicks and a broader UK report around 841K impressions / 4.67K clicks / 0.6% CTR / average position 11.3. These are different report views and must not be combined.
- Example Polish product page: /pl/products/screw-e27-light-bulb-lamp-holder-base-pendant-socket — 934 UK impressions / 1 click in the shown report.
- Example Polish collection: /pl/collections/pendant-lights — 1,084 impressions / 0 clicks in the shown report.

3. Shopify Markets findings

Screenshots showed the EU Market active with Poland included, PLN currency, ledsone.co.uk and English, Dutch, Polish and Spanish languages. Netherlands Market was active with Netherlands, EUR and ledsone.nl using Dutch. International was active with 25 regions, and the UK Market was active. The screenshots do not fully establish every individual country setting.

4. Search Console evidence

For “e27 socket”, a UK-filtered page comparison reportedly showed the Polish product URL with 281 impressions / 0 clicks and the English product URL with 208 impressions / 0 clicks. A separate broader UK query view showed 410 impressions / 1 click / average position 7. These are different report contexts.

This demonstrates overlapping visibility for at least one query, not proven cannibalization. The screenshots do not establish ranking displacement or lost clicks.

5. Technical checks already completed

- Canonical: sample English and Polish E27 product pages showed self-referencing canonicals.
- Hreflang: sample source showed en, es, pl, nl, nl-NL and x-default; the inspected English/Polish references appeared reciprocal.
- HTML language: sample Polish page showed lang=pl and English page showed lang=en.
- Indexing: sample Polish and Spanish URLs were indexed; user-declared and Google-selected canonicals matched the inspected URL in those examples. English sample was also indexed with matching canonical.
- Sitemap: https://ledsone.co.uk/sitemap.xml showed Success, 23,635 discovered URLs and last read 20 October 2026. Individual URL Inspection messages about referring sitemaps do not alone prove a broken sitemap.

- Translation: after Shopify Translate & Adapt work, the user confirmed https://ledsone.co.uk/pl/products/10mm-male-thread was displaying Polish. This confirms that sample only.

6. Supported findings vs unknowns

Supported by conversation evidence

- Locale pages are required for international customers.
- Some locale URLs are indexed and appear in UK Search Console data.
- Sample canonical/hreflang checks did not reveal an obvious defect on the inspected English/Polish pair.
- An example query had both Polish and English URLs receiving UK impressions.
- The sitemap submission showed Success.

Not yet proven

- All 2,612 locale URLs have a defect.
- Systematic cannibalization is occurring.
- All translated catalogue and theme content is correct.
- All locale URLs have correct hreflang, canonical, indexability and market targeting.
- A theme-level fix is necessary or the exact code change is known.

7. Work status

- Completed: reviewed Shopify Markets screenshots.
- Completed: checked sample canonical, hreflang and HTML language.
- Completed: checked sample URL Inspection and sitemap evidence.
- Completed: investigated translation display; user confirmed the sample Polish page was showing Polish.
- Not done: no wholesale language removal, noindex or redirect.
- Not done: no confirmed theme/code fix.
- Not done: no exhaustive audit of all 2,612 locale URLs.

8. Next step — continue, do not restart

1. Do not repeat sample canonical/hreflang/indexing checks already completed unless new evidence gives a specific reason.
2. Consolidate UK Search Console evidence by /pl/, /nl/ and /es/ and compare locale URLs with corresponding English pages for the same queries and page types.
3. Record date range, country filter, page filter and query filter for every metric; do not mix different report contexts.
4. Look for repeated patterns across templates/markets and test representative URLs before proposing a shared fix.
5. Only implement a change after the defect is demonstrated; validate representative English and localized live URLs afterward.

9. Current status

INVESTIGATION IN PROGRESS — ROOT CAUSE NOT CONFIRMED.

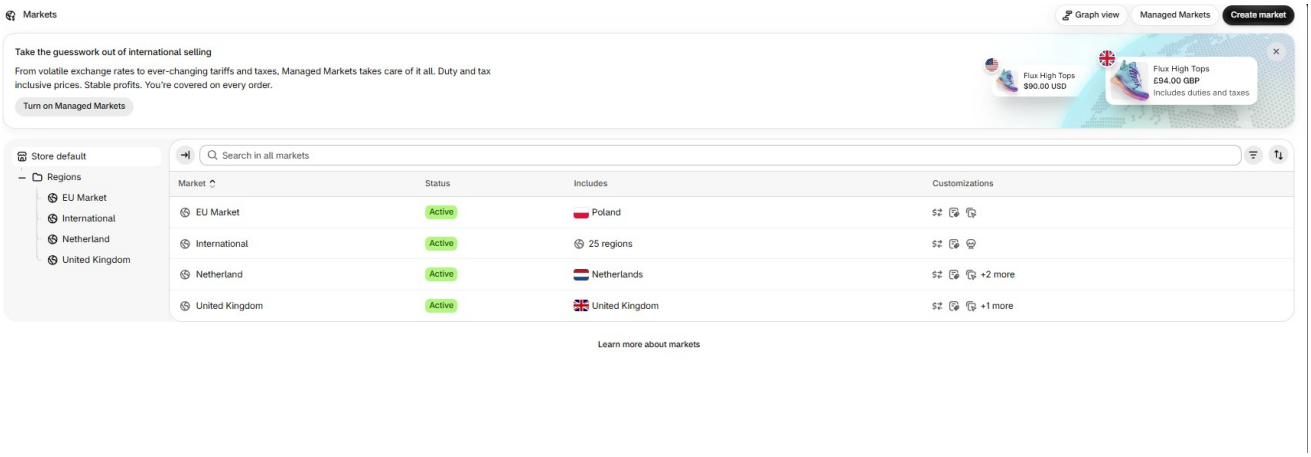

No production SEO change should be reported as completed for this ticket yet. The sample checks are not a full audit and do not resolve the UK visibility question.

10. Screenshot appendix — all conversation screenshots

The following appendix includes all 67 image attachments available from the beginning of this conversation, in attachment/upload order. Captions preserve the original filename and sequence. They do not imply every visible value was independently re-measured.
